The new Book Series aims to publish books and monographs on Deep Learning Neural Networks and/or works specific to particular and related methods in machine intelligence and artificial intelligence, and on the overall impact of the field on society.

Topics include (but not limited to):

- | | |
|--|-----------------------------------|
| [a] neuronal architectures in machine intelligence | [g] image and video analysis |
| [b] security (web security) | [h] speech processing |
| [c] financial mathematics & computation | [i] natural languages |
| [d] computational medicine (including diagnosis, prediction and implanted devices) | [j] games |
| [e] search engines | [k] industrial applications |
| [f] information retrieval | [l] fault detection |
| | [m] impact on society (sociology) |
